Bridging the Gender Divide in Nursing

Key Issues Related to Men in the Nursing Profession

Thursday, March 19, 2015
School of Nursing, Carrington Hall
5:00-6:30 pm, Room 208

How can we facilitate gender diversity in nursing?
What are the challenges and triumphs men face in nursing?
What are strategies for success and key organizations for men in nursing?
How do we support building strong collegial relationships between men and women in the nursing discipline?

This seminar is most appropriate for all students considering nursing as a career path, and/or current nursing students. All students involved in the CaBB program are encouraged to attend regardless of gender/sex. The session will incorporate life experiences of male nursing students and nursing professionals (including nursing faculty) to educate and inspire students from all backgrounds.

The CaBB project (Careers Beyond the Bedside) is a federally funded grant (HRSA Grant# D19HP24298) to increase diversity in the nursing workforce. The program targets students currently underrepresented in the nursing profession. This program seeks students from economically or educationally disadvantaged backgrounds, and/or historically under-represented ethnic minority groups, “first-generation” college students, or students who currently reside in a medically under-served geographic area. Many of the benefits of the CaBB project are open to any pre-nursing/nursing student.
