

## Basic ECG Interpretation Part II

**Instructor:** Tracy Vernon-Platt

**Length:** 3 hours

**Program Description:**

Basic ECG Interpretation Part II is designed to enhance the bedside nurse's knowledge on ECG interpretations in order to promote positive patient outcomes. This 3-hour workshop will provide participants with content that focuses on ischemic changes on an EKG, ventricular arrhythmias, left and right bundle branch block, utilization of emergency drugs, and actions for the treatment of dysrhythmias.

**Learning Objectives:** At the end of this program, participants will be able to:

- Correctly interpret abnormal EKGs
- Discuss the treatment for common arrhythmias
- Describe the use of emergency drugs in the treatment of arrhythmias.

**Audience:**

RNs and other healthcare professionals
