

Implementing New Programs

Instructor: Jennifer Leeman

Length: 60 minutes

Program Description: This interactive workshop provides a practical guide to best practices for implementing and sustaining new programs in practice. Building on both implementation science and quality improvement models, the training introduces participants to tools they can use to develop a team charter, assess implementation readiness, create a process flow diagram, and create an implementation plan. Didactic presentation is coupled with hands on activities during which participants apply what they have learned.

Learning Objectives: At the end of this program, participants will be able to:

- Describe six steps to successful program implementation
- Assess a setting's readiness to implement an EBI
- Develop an implementation plan

Audience:

RNs and other healthcare professionals
