

Lab Interpretation: Connecting the dots, Part I

Instructor: Suja Davis

Length: 3 hours

Program Description: The focus of this live webinar course is to enhance the knowledge on common electrolytes and renal function tests for nurses and allied health professionals. Additionally, participants will learn about the implications for patient teaching and monitoring related to the each of these labs.

Learning Objectives: At the end of this program, participants will be able to:

- Describe the indications for monitoring common electrolytes
- Verbalize the signs and symptoms of abnormal electrolyte levels
- Discuss the management of common electrolyte abnormalities
- Apply the knowledge gained from the webinar to unfold selected case studies that address common electrolyte abnormalities
- Analyze the common renal function tests, and its patient implications
- Apply the knowledge gained from the webinar to unfold selected case studies that address common renal function abnormalities

Audience:

RNs and other healthcare professionals, nurse refresher students
