

**NEWBORN PHYSICAL ASSESSMENT: FOR NB NURSERY AND PRIMARY CARE
HCPS**

Instructor: Andrea Biondi

Length: 3

Program Description: This lecture is a system by system review of what to include in a comprehensive NB exam. Common findings in the NB exam from head to toe will be reviewed as well as when to involve specialty services for abnormal findings. In addition, maternal assessments as they relate to breastfeeding, postpartum depression and bonding will be reviewed.

Learning Objectives: At the end of this program, participants will be able to:

- Identify the most common abnormal findings during the NB exam by body system
- Identify more serious conditions in the NB that require immediate referrals
- Identify common treatment modalities of NB abnormalities based on current research
- Identify key maternal assessments when assessing maternal-infant bonding, breastfeeding and PPD

Audience:

RNs, NPs, PAs, MDs
