

## **PEDIATRIC RASHES: RED FLAGS, DIAGNOSIS AND TREATMENT**

**Instructor:** Andrea Biondi, DNP NNP CPNP RN

**Length:** 3 hours

**Program Description:** This program provides the participants a guide for assessment of pediatric rashes. Common red flags related to rashes are presented. Evidence based interventions for common pediatric rashes are presented. The presentation also outlines times when patients with rashes must be referred for further evaluation and treatment.

**This presentation can be provided in two formats based on audience:**

- One option includes an overview of newborn rashes
- The second option is a review of rashes of school aged children

**Learning Objectives:** At the end of this program, participants will be able to:

- Review key assessments that lead to the diagnosis of common rashes in children
- Discuss common red flags noted when assessing patients with common pediatric rashes
- Identify when patient with rashes need further assessments by HCPs or Dermatology
- Discuss evidence based treatment options for common pediatric rashes

**Audience:**

RNs, NPs, Ps, school nurses
